\*\* SPECIAL NOTE FROM EDITOR (By KB8NW) -- Dayton HamVention Wrap-up Report: Well, after many hours of lost sleep and walking many miles throughout the flea market and Hara area (my brother-in-law said we averaged over 5 miles a day), I am very burned out and still recovering in Tennessee a week later watching the grandkids (yea - like that is going to happen with a 1 and 3 year old)..... Anyway, the HamVention was still fun and interesting in spite of some rain. DXer's notable events:

\* Southwest Ohio DX Association (SWODXA) DX Dinner award announces:

- K1N was awarded "DXpedition of the Year"

\* DX Forum Presentations:

In all, I really enjoyed myself especially with the huge crowd that attended the NODXA Hospitality Suite at the Dayton Crown Plaza all three nights -- where many well-known DXers/DXpeditioner show up every year. I had the great pleasure to meet and talk (for the first time) with CQ Hall of Famer Zorro Miyazawa, JH1AJT [https://scontent-dfw1-](https://scontent-dfw1-1.xx.fbcdn.net/hphotos-xfpl/v/t1.0-9/s480x480/11009134_960839373950684_2326128284489499390_n.jpg?oh=a3bde0767dd430a0e07a1af3bc759034&oe=5604BCD9)

I hope to see you all again next year (May 20-22nd, 2016), and if you have not heard -- Hara Arena will be doing some renovations to the Hara complex which is expected to be completed by next year's show.....

Till next year.. 73 de Tedd KB8NW

P.S. I know I said that there probably would not be a bulletin this week, but since there was so much in my mailbox I figured I better send one out anyway.....

Activity will probably be "holiday-style" using a single station with 100w and a Buddipole antenna system. JW, SVALBARD. Eric, LA2US, will once again be active from the Arctic. Look for him to sign JW2US from Hopen Island (EU-063) sometime during the first week in June, and he will stay for 6 month. Eric states, "I will be operational on CW on/around IOTA frequencies or at the lower band edges. This is a spare time operation - no DXpedition, and as I will be working very odd hours, I'd rather not do any skeds. I'll be in the shack when work and other tasks permit." His recommended way to request a JW2US QSL card (for Bear Isl. or Hopen Isl.) is via the OQRS on ClubLog, both direct and by the Bureau. This is not a dedicated DX-pedition, but he hopes to operate in evenings after work which will determine his on-air time. He plans to operate as KL2HD/p (from Adak) or KL7NWR (from Amchitka). He thinks 20m or 17m SSB are most likely. Jeff will use 100w and a homebrew adjustable quarterwave vertical on the ocean. If he can fit a 500w amp into his luggage, he will take. QSL via KL2HD.

REALTIME BAND CONDITIONS WEB SITE <<http://www.bandconditions.com>>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) bandcondition information to CW QRPP, QRPE and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.

SV/A, MOUNT ATHOS (Update). If you have not heard, the SV2/YL7A operation is not going to take place. Kostas, SV1DPI, who talked with SV2ASP/A reported on May 19th: "Monk Apollo is outside Mount Athos, working with the olives, but he offered himself to ask Holy Council and inform us about the operation. The official news is that Holy Council prohibited the entrance of the YL guys in Mount Athos because they announced a Ham Radio operation without a license from Holy Council. The YL guys have a visa to enter Mount Athos this morning as pilgrims but NOT a license to operate. After this they can not enter in Mount Athos either as pilgrims." The latest news is that the team was on their way home on May 21st. The complete details are now online at: <http://www.lral.lv/exped/sv2/yl7a>

VC2, CANADA. Victor, VA2WA, will use the special prefix/callsign VC2W during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/High-Power (A) entry. This callsign is only valid for those 2 days. QSL via his home callsign, direct or LoTW.

VO1, CANADA. Mike, VE9AA/VE1TTT/VO1TTT, will be active as VO1TTT during the the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band entry. Activity outside of the contest will be on 160-6 meters. There will be very limited 6m operations from Grid Sq. GN37 before the contest. Mike states, "However I am driving through many VE9, VE1 and VO1 grids on May 25/26th and June 1/2nd. Will run CW beacon on 50.095 MHz when possible."

QSL via VE3IKV.

VP2M, MONTSEERRAT (Update) Operators Barry/NOKV, Ken/WOETT, Greg/WOZA and Jim/WDOE will be active as VP2MKV from Gingerbread Hill, St. Peters (grid square FK86), between June 10-18th. Activity will be on 80-2 meters using CW, SSB and RTTY. They will also participate in the ARRL VHF Contest and some satellite operations (FO-29 only on selected passes). The two primary radios will be Elecraft K3's with 500 watt amplifiers. Antennas include a Mosley Classic 33 on 10/15/20, a folding hexbeam by Folding Antennas (Germany) on 20-10 meters, verticals on 30 and 40 meters, a dipole on 75-80 meters, and an M2 5 element 6 meter beam. They will run 500 watts on 6m SSB/CW and FSK441. A 6 meter beacon is planned and will be on 50.102 MHz when the station is not manned, and the receiver will be active between beacon transmissions to listen for calls. The primary callsign for the operation will be VP2MKV, and VP2MTT will probably be used on 6 meters. Near 24 hour operation is planned.

Tentative satellite pass plan for VP2MKV operation: They will attempt to be on the first two FO-29 ascending node passes June 11th through 20th. If time allows they may be on the third ascending node those days. Those passes happen in late morning to mid afternoon Montserrat time. On those passes they will look first for South America when the satellite is south of them, then North America, then Europe during the short mutual window. If there are 2 meter or 6 meter terrestrial openings during the VHF contest June 13th and 14th, they will not be on satellite at those times.

Logs will be uploaded to LoTW soon after the group returns to the US. Paper QSLs via NOKV, direct or via the bureau. US addressees send SASE; addressees outside the US send SASE plus 2 USDs for return postage. Use of ClubLog has not been finalized at this time. Additional information will be posted under VP2MKV on QRZ.com.

VP2M, MONTSEERRAT. Lu, W4LT, will be active as VP2MLU from Montserrat between July 8-17th. Activity will be holiday style as a one man DX-pedition with low power and low antennas. He will be active in the 2015 IARU HF Contest (July 11-12th) as a Single-Op/Mixed-Mode entry. His rig will be a Kenwood TS590s into a Carolina Windom 80LP and/or Original S9v 31ft Vertical mounted on the veranda railing. QSL via W4LT, direct, by the Bureau or LoTW.
