13 COLONIES (Special Event). Once again the annual "13 Colonies Special Event" will take place between 1300z, June 30th and 0400z July 5th. The theme for 2015 will be "Founders and Patriots of the Republic". The certificate is printed on heavy card stock. Stations working one state or, as many as all 13, will be eligible for the certificate. A "Clean Sweep" indicator will be affixed, for those lucky enough to "Q" all 13. A special endorsement will be attached for stations contacting their sister operation, WM3PEN, in Philadelphia, PA, where independence was declared. New for 2015, the 13 Colonies have added a second sister event station GB13COL will operate from Durham, England. The 13 Colonies certificate will have a Liberty Bell added for a contact with WM3PEN. They will also offer a special QSL card printed just for this event. There should be at least two stations from each on the 13 colonies on the air, as well as Super contest stations, multi-operator Club stations and OM and XYL teams. The U.S. original 13 colonies are CT-DE- GA-MA-MD-NC-NH-NJ-NY-PA-RI-SC-VA. Special events stations mentioned are: K2A (NY), K2B (VA), K2C (RI), K2D (CT), K2E (DE), K2F (MD), K2G (GA), K2H (MA), K2I (NJ), K2J (NC), K2K (NH), K2L (SC), and K2M (PA). All HF bands will be in play except the WARC bands and 60 meters. 2 meters and 6 meter simplex are encouraged. All modes of operation should be represented - SSB, CW, RTTY, Digital, and the Satellites. The mode of operation is up to the individual colony state station. For more details on the stations, suggested frequencies, QSL info and on how to obtain the special certificate, see: <http://www.13colonies.info>

KH5/P DXPEDITION NEWS (Press Release #2): [edited] Lou (N2TU) and Craig (K9CT) previously announced a DXpedition to Palmyra Atoll at the International DX Convention in Visalia, California. Palmyra (KH5) ranks #9 on the Most Wanted List and #2 in Europe.

The Pacific Islands DXpedition Group has been awarded permission to activate Cooper Island in the Palmyra Atoll, January 11-26th, 2016.

A team of highly experienced operators and veterans of many DXpeditions has been assembled. Team members include Craig/K9CT, Lou/N2TU, Jerry/WB9Z, Tom/ND2T, Mike/K9NW, Ralph/K0IR, John/K6MM, Bob/K4UEE, Hal/W8HC, Dick/W3OA, Jim/N9TK and Glenn/W0GJ.

The Team plans to operate five stations, 160 to 6 meters on CW, SSB and Digital modes, using a callsign to be announced at a later date. Antennas dedicated to working Europe will be deployed due to the high need and propagation path difficulty.

Critical to major DXpeditions are the immediate, up-front commitment costs. For instance, most of the equipment (antennas, coax, wire, connectors, and site material) has already been purchased, tested and shipped to Palmyra. These procurement and shipping costs are a significant portion of the overall DXpedition costs. It is estimated this DXpedition will incur costs of over 200,000 USDs plus individual and personal expenses.

We are pleased we have received support from so many Foundations, Clubs and Individuals already. We are about \$30,000 USDs short of our need for the next payment November 1st. So please donate as soon as possible to help with the upfront costs.

Our website, <Palmyra2016.org>, has a Donate link to facilitate your generous contribution. Without your support, this DXpedition would not happen!

....Lou N2TU and Crain K9CT

Outside of the contest Jim (KP2/AD5OW), Jeffrey (KP2/N5TIT) and Debbie (KP2/KF5MEG) will be active on 80-10 meters using SSB, RTTY and PSK31. QSLs can be sent to the individual callsigns via Bureau, LoTW, eQSL or direct via their home callsign with a SASE for USA or 1 IRC for DX.

REALTIME BAND CONDITIONS WEB SITE <<http://www.bandconditions.com>>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPP, QRPE and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.
