2016 DIGIATL MODE MOST WANTED SURVEY (Press Release). All digital operators are invited to participate in the "2016 Digital Mode Most Wanted Survey". Previously known as the "RTTY Most Needed DXCC Entities Survey" in 2002, 2005 and 2011, the name has been changed to reflect current times and to be more in line with the Digital DXCC award.

Several entities at the top of the 2011 list have been active recently, so now is a good time to find out what's needed on the digital modes. The survey can be found here: <http://survey.hamdocs.com/index.php/468764>

Please be sure to read the "How to use the 2016 Digital Mode DX Most Wanted Survey" at the top of the page. The survey will only be available for two weeks and will close at 2359Z on Friday, May 13, 2016. So don't delay, please complete the survey promptly. It is our hope to have the results available before the Dayton Hamvention. It's very important that every digital operator take part in the survey in order to achieve the most accurate results possible. These surveys help DXpedition planners and are of interest to all digital operators. Feel free to forward this invitation to other groups.

A new feature has been added to this year's survey. It's now possible to work on the survey, take a break from it and resume it later. You don't have to complete the survey all at one time. There is a button at the very end of the survey that says "Resume Later". Clicking this option will bring you to a page that asks for your name, a password and email address. Email will be sent to you with a link that will bring you back to the survey you were working on. Or you can resume the survey using your password.

Thank you for your participation!

NCDXF NEWSLETTER. The Northern California DX Foundation's (NCDXF) 2016 Spring Newsletter is now available online with some great articles on recent DXpeditions at: <http://www.ncdxf.org/newsletters/2016-SPRING.pdf>

P5, NORTH KOREA (P5DX-what could have been...). On April 26th, Paul Ewing, N6PSE, founder of the Intrepid-DX Group www.Intrepid-DX.com, Co-Leader of the January 2016 DXpedition to South Sandwich and South Georgia Islands, posted the following on his Blog page (excerpt): "As a Blogger, my blog represents my thoughts and my views only. The content of this Blog does not represent anyone else but me.

This morning, I had to cancel a DXpedition. It was one of the hardest decisions of my life. It was not for lack of permission, it was not for lack of a team and equipment willing to go.

The prospect of a P5 activation brings out the worst in this hobby. The posers, the nuts, the ill-informed and the opinionated. But in the end, it mostly came down to a surprising lack of support and lack of funding from some of the world's paramount DX foundations when asked to fund grants to the world's #1 Most Wanted Entity."

This was just a excerpt/portion of a very long article that Paul wrote about a major DXpedition to P5 that was going to happen in May. Paul states,

"After tireless efforts, we finally had a letter of invitation in hand from DPRK authorities inviting us into the country as the first-ever large scale amateur radio event." However, something happened which bought it to an end.

REALTIME BAND CONDITIONS WEB SITE <<http://www.bandconditions.com>>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPP, QRPE and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.

PIRATE ALERT. "The Daily DX" reports: The ever-persistent Hassan the pirate from Baghdad, Iraq, continues to plague the Amateur Radio bands. This guy has been pirating and bootlegging multiple calls for several years. He has been heard bootlegging the calls YI1HR, YI1H, YI1HRP and YI1HI and pirating the calls YI1BGD, YI1IRQ, YI1DZ and most recently TA7/YI1RZ. Unfortunately in Iraq there does not seem to be any enforcement to take Hassan off the air, much less do anything about the situation. Therefore let's get the word out not to work or spot Hassan who operates on 20 Meters SSB, usually around 14178-14188. In fact the best

policy is to ignore him completely on the air.

ZA, ALBANIA (by ZA/OH2BH - April 28th - May 2nd) [Press Release]. Memories of rare DX: It was 1970 -- 46 years ago -- when ZA/OH2BH came on the air for the first Albania DX activation. Some 860 QSOS were made in a serious demonstration as Albania was on the top of all most-wanted lists.

That operation led to the first major Albania activation 21 years later -- in 1991 -- as ZA1A, by a large multi-national group. There were also several follow up operations by foreign operators, as well as an operation by ZA1A students, such as Geni, ZA1B, who was the Government liaison for ZA1A.

In 2003, a ham radio academic course, the first of its kind, was conducted at the Technical University of Tirana and ZA1UT was established as a club station. At the same time the contesting part of the group activated ZA1A

in a multi-multi on the Durres beach and won Europe.

Now Martti is returning to that same beach with many fond memories, and he would like to contact some of the original 860 while he is there. Martti will only be on 17/20m. He will also sit down with Geni, ZA1B, to recall and treasure those memorable days.

So good days are now coming back.

ZD7, ST. HELENA ISLAND (ZD7VDE Postponed). Bill, G0VDE, reports: "I've just received the disappointing news that the opening of St Helena airport has been postponed. Following the recent 'implementation flight' it appears there were issues with turbulence and windshear on approach to the runway from the north. As a result of the data gathered and the conditions experienced, it has been decided that there is some additional work to be done in order to ensure the safe operation of scheduled passenger flights to and from St Helena Airport.

More information is available at:

<http://www.sainthelena.gov.sh/airport-opening-ceremony-postponed/>

This is obviously disappointing but safety at a new airport is clearly paramount. The dates of my operation will be later in the summer, and I will let you know as soon as more information is available."
