REALTIME BAND CONDITIONS WEB SITE <http://www.bandconditions.com>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRpp, QRpe and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.

XU7, CAMBODIA (PRESS RELEASE #3) [edited]. MORE ROOM TO JOIN THE XU7MDC - - The XU7MDC international Team is working very hard in these weeks to build, a very professional Dxpedition. They are testing many new items and tools overall to be able to reduce weight on the plane and maximize the results on their location at Sihanoukville Beach, Cambodia. As a matter of fact a little change in their local accommodation gives them now possibly more room for another CW operator and one more SSB operator. So if anybody would like to join them, they suggest to contact them as soon as possible. Please contact the leader Antonio, IZ8CCW iz8ccw@mdxc.org, and/or the co-leader, Gabriele, I2VGW i2vgw@arrl.net. They will be on the air from November 4-14th, 2016. They remind everyone that they plan, as usual, to operate 24/24 hours with 5 stations from the beach with a particular focus on the low bands and Digital modes. Antonio, IZ8CCW, and Gabriele, I2VGW, will be sharing their new adventure with the other 18 members/operators from five countries. More details and information can be found on their Web site at: <http://www.mdxc.org/xu7mdc>
