3Y0Z BOUVET DXPELITION (A Visit To DX Engineering/A Message From The 3Y0Z DXpedition Team).....

\* On January 11, 2017, five of the 3Y0Z operators (K0IR, N9TK, W8HC, W0GJ, & WB9Z) and Chief Pilot, NV9L, met with Tim Duffy, K3LR, and 11 members of his DX Engineering staff. The chief topic of discussion was development of masts and antenna support hardware able to withstand the winds and weather of Bouvet. The HF antennas and EME arrays need to be at a height where they can be effective and yet able to withstand the harsh conditions of Bouvet. Working drawings were developed and the engineers at DX Engineering are now developing prototypes for testing. The group also considered how products developed for Bouvet might also serve unique needs of other radio amateurs. Visit the following Web page to see pictures of the meeting:

<http://www.bouvetdx.org/news-and-updates>

\* A Message From the DXpedition Team -- Our Commitment to You --

A DXpedition to Bouvet is not to be taken lightly. Bouvet is a serious and dangerous place; demanding attention to safety, serious planning, physical and mental endurance, time to allow for storms and rough seas, and a team with the right balance of size, experience, talent, emotional stability, and sense of purpose. We feel we have met these criteria, but when we arrive at Bouvet we also need to attend to our obligations to you, our financial supporters and DX audience. How we meet those obligations and expectations will define us as a team.

It is our belief that, given the rarity of this entity, we must pull out all the stops. We must utilize maximum legal power, the best antennas, world class transceivers, propagation studies, the best location on the island, a safe vessel and crew, highly qualified helicopter pilots, and the complimentary resources of our team. We will need near real time information flowing to us through our extensive pilot system so that we can maximize our primary purpose – providing QSO's.

We have a conscience. We will not do this just for the sake of doing it and end up using a compromised location, less than 24/7 coverage of all open bands, limited power, inefficient antennas, and insufficient time at the island. We want to do this right and give everyone the best possible chance of making the QSO's they desire, be they on 160, the WARC bands, SSB, CW, RTTY, or 6 and 2 meter EME.

Rest assured that we will do our very best for you! No shortcuts or compromises! ..... The 3Y0Z Bouvet Island DXpedition Team

\* Also, watch an interview by Jim Mornar, N9TK, with Tim Duffy, K3LR, at DX Engineering on January 11, 2017 in Tallmadge, Ohio. Jim Mornar, N9TK, is one of the team members that will be activating Bouvet Island as 3Y0Z in January 2018. Bouvet Island ranks number 2 in the most wanted entities by amateur radio operators all over the world. See the interview at: <https://www.youtube.com/watch?v=WRhW83k5mk0>

REALTIME BAND CONDITIONS WEB SITE <http://www.bandconditions.com>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRpp, QRpe and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the POLSAR system used by NASA.

<http://www.bigskyspaces.com/w7gj/Indian%20Ocean%202017.htm>

Tickets to Perth, Australia have been purchased, and reservations for lodging in both DXCC entities have been made. Although I am not able yet to complete the purchase for the tickets from Perth and the lodging, I wanted to spread the word about the dates for the DXpedition so people can make plans. I will be adding more detailed operating schedules and additional details in the coming weeks and hope to be able to complete the very substantial purchases for additional flights and lodging in the coming months..

With the great increase in people capable of using digital modes, I hope to be able to provide these rare DXCC entities to many serious 6m DXers. Please check back for updated information! GL and VY 73, Lance"
