DAY-XENIA HAMVENTION WRAP-UP NEWS.....

- * During the Southwest Ohio DX Association (SWODXA) annual DX Dinner it was announced that the VK0EK Heard Island was awarded "DXpedition? of the Year". See:

<https://vk0ek.org/2017/05/21/swodxa-2017-dxpedition-of-the-year>

Also at the dinner, Bill Moore, NC1L (SK), was inducted into the "CQ DX Hall of Fame" as well as Jerry, WB9Z.

- * HAMVENTION (Review By Editor) -- The Xenia HamVention put on by the DARA group this year should be commended for their quick replacement of Hara Arena. Yes, there were a few bugs during their first run, but I am sure these will be corrected in the future. The major problems seem to be traffic flow, muddy flea market/parking areas and some complaints about the heat in the buildings. The vendor layouts in the buildings seemed to be sufficient. One of the big improvements was the selection of many different food vendors. Probably the low point of the HamVention was the rain which definitely hampered the field market area. Some individuals didn't even attempt to go to that area because of the mud. In all, the new venue was well

attended, and most reports on the internet were very favorable.
Your editor looks forward to seeing next year's HamVention.

REALTIME BAND CONDITIONS WEB SITE <http://www.bandconditions.com>:
The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRpp, QRPe and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.
