425 DX NEWS MAGAZINE ---> The October 2013 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

5J0R ---> The San Andres expedition's website has been updated with pictures and statistics from the recent operation. 5J0R made 80508 QSOs (33426 CW, 37033 SSB and 10049 RTTY) with 22704 unique callsigns in ten days. The OQRS for direct QSLs is up and running, bureau cards should be requestd through the dedicated OQRS when it is made available on the website (<http://www.dxfriends.com/SanAndres2013/index.php>).

DXCC NEWS ---> K9W (Wake Island, 2013 operation) has been approved for DXCC credit. [TNX NC1L]

IRON HAM CONTEST ---> Drawing inspiration from the Ironman Thriatlon races, the Araucaria DX Group sponsors the WW Iron Ham Contest, a competition that combines the main operating modes (Phone, CW and RTTY) into one single contest. The second edition will be held on 28-29 December (from 12 UTC on Saturday through 11:59 UTC on Sunday). The 24-hour contest is organized to have 8 hours of operation on each mode in periods no shorter than one hour. Complete details (look at this year's very special prize for the winners!) can be found at www.ironham.com.br [TNX PY5EG]

THE BIG PICTURE... ---> "The Big Picture of Expedition Operating and

the Direct Relationship to Anti-Social Pileup Behavior" is a 43-minute presentation by Rick, K6VVA. It "describes the problems and also solutions to the dysfunctional behavior we unfortunately hear in DX & IOTA pileups on the Amateur Radio bands these days". It can be found at <http://youtu.be/svLlfrFA-1E> [TNX K6VVA]

Z81X ---> The 14-28 November Z81X operation from South Sudan [425DXN 1173] will employ DX University's "Best Practices for DXpedition Operating". With the exception for 160 and 80 metres (1826.5 KHz and 3523 KHz), they will not pre-announce their operating frequencies, but will depend on "the modern Internet spotting networks". Near the end of the operation, they will use "a version of e-Pilot" in an effort "to work as many of the 'more deserving, but DX challenged' DXers as possible".

Z81X "will also look for conduct that is consistent - or inconsistent - with the 'Best Practices for Courteous and Efficient DXing' presented on the DX University Webpage" (go to www.dxuniversity.com, click on "DXing Tools" and then on "Best Practices" in the drop-down menu). Be aware that they will "record many segments of the operation in stereo, pileup on one channel, Z81X on the other", and that "selected segments will be uploaded to the DX University website to illustrate certain points".

As the activity will be running for two-weeks, SSB operation on the low bands will come during the second weekend. During the CQ WW DX CW Contest there may be as many as three single-band stations activated. QSL via OH0XX (OQRS on Club Log).
