>>> FT5ZM, AMSTERDAM ISLAND <<<

This is the latest Press Release, sent on 3 January by K0IR & the Amsterdam Island DXpedition Team:

We are now 6 days from departure from the U.S. The Braveheart is making its way across the Great Australian Bight and the North Corridor Radio Group of Western Australia has a stockpile of supplies queued up and waiting for us. Momentum has taken over now and there is no turning back.

Upon arrival in Fremantle, the Braveheart will re-provision and refuel to 90,000 to 100,000 liters of fuel. We will load the materials we've obtained from the NCRG, do a little shopping for personal supplies, set up our maritime mobile station, take our sea sickness pills and patches, and be prepared to sail on January 15th.

We'll be passing through some rare grids on the way to Amsterdam Island and we are anxious to hand out QSO's from them. Be sure to look for us on the bands and track us on our website in near real time. Landing on Amsterdam can be "exciting." Wish us good luck with this. We'll have some heavy work to do upon landing and expect our set up time to take at least a full day. We'll let you know when we get there.

This will be our last press release. It has been a long time of preparation and a great deal of work, but that is behind us now. The next time you hear from us, it will be a signal from the Braveheart or from Amsterdam Island. As you can see from our financial status on our home page (www.amsterdamdx.org), we still need help. If you haven't helped us yet, please consider doing so. If you've supported us, thank you - you've kept us afloat to date.

AS-143 ---> Che, BA7CK was active from the Paracel Islands (AS-143) from 31 December to 3 January. This was a reconnaissance trip in preparation for a group DXpedition planned for April. QSL this operation only via BA4TB. [TNX DX World]

While on Wake, he will also be QRV as WH9/W1AW for one week to commemorate the ARRL Centennial. Plans for both locations are to operate SSB, CW and RTTY on 160-6 metres. QSLs via NN1N (direct only) and LoTW "after 6-12 months".

- the other station must have submitted a log for the IOTA Contest
- your QSO must be in the other station's log
- the band and mode must match exactly
- the time must be within +/- 15 minutes
- the QSO was not rejected by the IOTA Contest Adjudicators If there are any problems, please email [iota.online@\[rs\]gb.org.uk](mailto:iota.online@[rs]gb.org.uk).

He is joined by Dan, W4DKS, and Bob, K3EST as Board Members. The website over which electronic logs for the CHASERS MARATHON should be submitted is being finalised, and details will be announced shortly.

Entrants' logs should contain only contacts with IOTA stations, and each QSO must include a full IOTA reference number (such as EU-001). It is recommended that logs be uploaded in ADIF (.adi) format; a log prepared as an Excel spreadsheet will be accepted, but paper logs will not be processed. Applications need to be submitted by 28 February at the latest. Any questions should be sent to [iota.chaser@\[g\]mail.com](mailto:iota.chaser@[g]mail.com). + SILENT KEYS + Max de Henseler, HB9RS, the founder and president
+ emeritus

of 4U1UN at United Nations headquarters in New York, died on 30 December at 80 years of age. In 1976 he reactivated the UN Radio Club station (K2UN), and introduced the new call sign 4U1UN on 4 February 1978. During his UN career he operated under various call signs, including 3D2RS, 5W1BK, 9Y4RS, DJ0AB, EL2DX, ET3RS, FO0RSM, HP1HN and XW8HB.

As for the current status of 4U1UN, The Daily DX reports that the station "was dismantled in early 2010 due to the massive renovation project on the Secretariat Building. All of the antennas were removed from the roof and all of the equipment packed up and are being stored in the UN. The club is seriously looking at several options in order to get 4U1UN back on the air as quickly as possible. Some of the options being considered include remoting the station, putting the station on the ground floor and running some 400-500 feet of coax to the top of the building or moving the station to another sovereign UN building".

Other recently reported Silent Keys include Hans Rixin (DJ6QP), Miloslav Bartos (OM3FZ) and Jerry Pittenger (K8RA), well-known manufacturer of a line of iambic and single-lever CW keys.
