3B8, MAURITIUS. Jean-Paul, HB9ARY, will once again be active as 3B8/HB9ARY from Mauritius between January 24th and February 15th. Activity will be on all HF bands, 160-10 meters, using mainly SSB, but some CW on 160m. QSL via NI5DX.

3B8, MAURITIUS (Update). Last week we reported that Robert, M0RCX, would be active as 3B8/M0RCX from Mauritius sometime around May 2-28th. Since then, Robert has updated OPDX about his activity. He informs that his trip to Mauritius is more as a tourist with his family and not seen as a DXpedition. His power will be limited to 100 watts, and he hopes to have a hexbeam, a wire beam for 6m (possibly made from the island's bamboo), as well as a delta loop and long wire available for his activity. He states, "Airlines are very

picky about what I can take and anything full of wires poses twenty questions and rightly so. My antennas; therefore, will be simplistic." His operating position will be close to the city center of Port Louis in the North West of the Island. He does plan/hopes to operate at least 3 hours a day on the following HF Phone bands:

40/20/17/15/12/10 meters. He is also planning to operate on some PSK and JT65 making some contacts with low to modest power levels (NO amp).

Robert has been asked about moonbounce over the horizon but thinks this may be optimistic with only 100 watts. He will set up a schedule on QRZ.com under 3B8MORCX (He states, "For some reason it will not permit the '/' after the suffix.") Also, look for him to put up a band schedule up (as soon as he can), but provisionally Robert will fly to Mauritius on May 1st, so he should be up and running between May 3-28th. As an added note, Robert also mentions, "I plan to live over there in about four years so hopefully I'll get a feel for it. QTH is inland about a mile from the ocean but there is a mountain behind me (east) this is why I wish to push my signals over to the west." QSL via MORCX, direct, by the Bureau or eQSL.

3V, TUNISIA. The "DXNL" (DX Newsletter) reports: "After two years of waiting Tunisia finally has a first independent Amateur Radio Association, the "Association Tunisienne des Radio Amateur" (ASTRA), which holds a club station license as 3V8HQ. QSL via the Bureau.

3Y, BOUVET (Possible activity). Carl, N4AA, Editor of QRZ DX, mentioned on January 16th, that Johan, ZS1A, reported: "Today the SAS Agulhas arrives at 3Y with a team of Norwegians on board. They are going to build a new base for scientists to stay for 2 months to do studies as early as December 2014." Some information is available at this Web site:

Activity will be on 40-10 meters using CW and SSB. QSL via F6AML.

7P8, LESOTHO (Looking For Operators!). Frosty, K5LBU, announced this past week that he is still looking for a few more team members for a DXpedition to Lesotho (7P8) this April. He states that they have 3 already and they are looking for more to join in the fun. They plan to arrive on the 21st or 22nd of April at Johannesburg and then drive down to Roma, Lesotho.

Frosty adds that they will have 1 or 2 Hex Beams, a Tennadyne T6 HF 6 elements Log Periodic, as well as putting up verticals for 160/80 and 40m. If they can end up with 6 or more operators, they will have at least 3 stations on the air. If interested, you can contact him at <3da0cf@gmail.com> or 281-682-6093.

8Q, MALDIVES. By the time you read this, Bjorn, SMOMDG, will be on Raa Atoll (AS-013) for one week. He is not expected to be on the air as 8Q7BM until about January 22nd. Activity will holiday style on all bands, 160-10 meters.

NCDXF PRESS RELEASE. The following was released on January 19th [edited]: "Press Release - FOR IMMEDIATE PUBLICATION -- NCDXF announces major grant to FT5/T Tromelin Island DXpedition -- January 19, 2014

The Northern California DX Foundation is pleased to announce a grant of \$25,000 to the FT5/T Tromelin Island DXpedition planned for November 2014. Tromelin is #10 on the DX Magazine's Most Wanted List for 2014. It is #3 Most Wanted on the U.S. West Coast.

Without major financial support from NCDXF, DXpeditions like this to challenging or rare locations would not be possible.

<<http://www.tromelin2014.com/en/>> has more details. Tromelin is a very small and very environmentally fragile area. There are strict limitations to the number of visitors and the time allowable on the island. The team's antenna plans, pilot feedback plans and enthusiasm should make this entity available to many DXers.

For the past 42 years the NCDXF has funded major DXpeditions to many Most Wanted Entities. The credit for these large grants goes to the NCDXF contributors, individuals and clubs, who make DX like this possible. Have you contributed yet?

73, Glenn Johnson, W0GJ, NCDXF Vice President <http://www.ncdxf.org>"
