Amateur stations will be restricted to USB, data, RTTY and CW modes, with a maximum bandwidth of 2.8 kHz, and a maximum power output of 100w ERP the same the US allows. The Industry Canada 5 MHz Decision document can be found at: <http://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf10623.html>

DXER'S TOOL. It is suggested that DXers take a look at the Web page <<http://www.dxheat.com/>>. DXHeat offers versatile filtering of incoming Real-time Web DX-Cluster DX Spots. With its built in push algorithms, it displays DX spots in an instant while being optimized for low band-width at the same time. Rich graphical tools and HTML5 Audio & WebSDR Technology make it indispensable for serious DXers. It also has over 25 million DX spots listed/searchable in its database. DXHeat also provides a visual tool to check the current band activity into all continents at a glance and a WebSDR to listen to any spot listed on your browser (No additional software or plugins needed). EDITOR'S NOTE: This site seems to work better in Google Chrome and an older version of JAVA (see details on the Web page).

The team has a great line-up of fine operators with many decades of DX-pedition experience. Operators mentioned are Jorg/DF6JC, Mathias/DJ2HD, Gerhard/DJ5IW, Markus/DJ7EO, Heye/DJ9RR, Christian/DL1MGB, Dietmar/DL3DXX,

Andreas/DL5CW, Thomas/DL5LYM, Felix/DL5XL, Bernd/DL6FBL, Dieter/DL8OH, Jörg/DL8WPX, Robert/SP5XVY and Bernd/VK2IA. They plan to have up to eight fully equipped HF stations on the air for about 17 days. No callsign was announced. They are looking for sponsors. QSL route will be announced soon. As Lord Howe is known for being not too big of an island, a lodge with access to nearly five acres of free area for erecting many antennas was booked. Lord Howe is also known for having strict baggage limitation on the regular flights. So most of the equipment will be transported by ship.

QSL via their home callsigns. A Web page is up and running with a needs (bands/modes) survey available at: <http://www.vp2v.dxpedititions.org> The VP2V team has an interesting statement on their Web page which states,  
-- We believe that it is more important to give a new country to "small pistol" than to give an 8th band QSO to a "big gun" station. By doing this, we hope to fulfill the demand for a "new one", especially from stations located in Japan and the rest of the Far East.

YW0, AVES ISLAND (Update to OPDX.1117/OPDX.1122). The 4M5DX Group has announced this past week that the YW0A operation will take place some- time in April for 10 days. On January 20th, Rafael/YV5RED and Rodrigo Lazo (a research scientist) met with the Directorate of Hydrography and Navigation of the Navy of the Bolivarian Republic of Venezuela (DHN -

ARBV) authorities in order to coordinate YW0A final schedule. They were told some majors upgrades and maintenance work will be done first on the Simon Bolivar Base on Aves Island during February and March. ZD8, ASCENSION ISLAND. Werner, DJ9KH, informs OPDX that he will once again be active as ZD8D from Ascension Island (AF-003) between February 24th and March 11th, for a more or less holiday-style-expedition. He states, "This expedition will start in Cape Town, South Africa, on board the RMS St. Helena. After a two days stop on St. Helena, where I hope to be QRV with a ZD7-callsign (Feb. 19th to Feb. 21st ), we (me and my wife) will arrive on Ascension Island Feb.24th. Activity will then start as soon as possible with a special focus on 160-40 meters. Werner mentions, "After having a lot of fun

with CW on my 2013 A35WH expedition, CW will be the preferred mode. We are also prepared for 60m and 6m." He will also be in the ARRL DX SSB Contest (March 1-2nd) as a Single-Op/Single-Band (possibly 10m). QSL via DL9HO. During the second week, they will have a second operator join him. Axel, DK9BDN, will visit them and help them, especially on CW. DK1IP will be the pilot station for Werner in Germany. The ZD8D Web page <<http://www.zd8d.de>> will be updated soon with all the information. You can use the ZD8D Online QSL Request System to get your ZD8D card(s). The OQRS is available for direct and Bureau cards.
