ANOTHER UPDATE (June 12th): Flo, F5CWU, posted on the FT4TA Web page: "A big step in the preparation of our operation has been done with sending three boxes containing the equipment. This puts an end to several intensive weeks devoted to the manufacture of antennas and other equipment that we had to test, weigh and pack. However, the list of tasks to be performed is still long and the whole team is mobilized on different folders." Pictures of the team packing equipment can be see at:

VK0, HEARD ISLAND (VK0EK Update/Radio Team Is Being Reorganized). On June 14th, it was announced on <http://vk0ek.org/>: "During the stay on Heard Island, we will carry out a full-service all-band, all-mode amateur radio operation using the callsign VK0EK. We expect to log as many as 150,000 individual contacts, operating from two sites: Atlas Cove and Spit Bay. In addition, we will use DXA3, the latest version of the real-time online log server that was used successfully on the Kure Atoll K7C (2005) and Clipperton Island TX5K (2013) DXpeditions. DXA enables DXers to get confirmation of their contact within 1 minute, thereby eliminating the need for insurance contacts. DXA is fully described in the book by KK6EK.

We have been building the radio team over the past year, and we have more than half the projected 20 participants committed. Unfortunately, in the past two months five team members withdrew, including the team leader, citing conflicts or the desire to participate in a shorter, less challenging DXpedition. This circumstance has relatively suddenly left us short of a team leader and committed operators, and therefore we have decided to completely re-organize the radio team. The first step is to identify a new team leader who is widely respected in the DXing community and experienced with organizing and leading DXpeditions to rare locations. The new team leader will have the authority and responsibility for rebuilding the radio team and for managing the amateur radio operations on Heard Island."

VP9, BERMUDA. Seppo, OH1VR, will once again be active as OH1VR/VP9 from Bermuda (NA-005) between July 10-13th. Activity will be on the HF bands using CW. QSL via his home callsign.
