SPECIAL NOTICE BY EDITOR: OPDX Webmaster John, K8YSE's, satellite grid expedition trip has come to an end as of October 1st, and he is now signing as K8YSE/7 from Mesa, Arizona. He states, "We operated in 27 different grids, most of them very rare, and we saw some beautiful country and weather conditions from snow to rain and hail. Most of the time it was warm and sunny. We operated from South Dakota, Wyoming, Montana, Idaho, Washington, Oregon, Utah, Nevada and Arizona and drove over 7300 miles in 27 days. We tent camped (about 65%) as weather and time permitted. All equipment functioned throughout the trip. An Icom 910H, computer controlled, was used on the linear birds and a Kenwood V7A was used on the SO-50 FM bird. Arrow antennas were used exclusively and performed well."

ADDED NOTE: John also informed me that "All of the September's Bulletins are now formatted in HTML for easier reading."

VK0EK, HEARD ISLANDS NEWS (Press Releases).....

* "Needed Poll" Page Added -- Rich, KY6R, reports: "I've added a simple 'VK0EK Needed Poll' page to the site. Please vote. Our priority will be to hand out as many ATNO's as the highest priority, but will also be providing a 'full service' DX-pedition. We will publish our detailed plans as well as some new innovative ideas on how we can help you get into the VK0EK log for your QSO needs - ATNO's as well as band fills. Please Stay tuned. The new Poll page can be found here:
<http://vk0ek.org/vk0ek-band-mode-poll/> "

* "Team Update" -- Rich, KY6R, reports: "We are pleased to announce that we have more than the minimum number of team members required for the vessel charter, and also that the team is well-balanced between scientists and radio operators. This enables us to proceed with the preparations for the expedition, including acquisition of facilities and equipment, planning logistics, defining specific scientific and radio operation goals, development of software, fund-raising, and other activities.

Approximately half the team will be carrying out exploratory science, searching for rare and unknown species of plants and animals. It is predicted that between 200 and 300 species live on Heard Island that are presently unknown. This comprises a significant part of the total biodiversity of this extremely isolated island, crucial for testing model predictions of the effects of global climate change.

The other half of the team will carry out a major amateur radio operation, using the callsign VK0EK. With the anticipated stay of up to 21 days on the island, we expect to log well over 100,000 contacts worldwide. Some aspects of the activity on the island will be seen in real time on the expedition website <<http://www.heardisland.org>>.

The full team, including the participants who will travel to the island, is listed here <http://www.heardisland.org/HD_pages/HD_Team.html>. Although participation is by invitation only, we welcome inquiries from anyone. The project is described in detail in the Project Description. Other documents are available on the expedition website. For more information, please contact the Expedition Leader: <robert@schmieder.com>

The Radio Team and Radio Team Support members are listed here:
