REALTIME BAND CONDITIONS WEB SITE <<http://www.bandconditions.com>>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPp, QRPe and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PoISAR system used by NASA.

Vic retired to Torch Lake, Michigan, as W1TYQ/8 with particular interest in 80 meters where he proceeded to rack up almost 300 countries. Vic also operated a good deal from HZ1AB, back in the "Hot Ziggety One American Boy" heyday. He was also an aviator, and was a key man in the development of aviation at the Arabian American Oil Company. Vic was known world-wide for his impeccable CW and top notch operating. YV0, AVES ISLAND (Jumping The Gun!)[If you missed OPDX.88.1]. Minutes after going to print about the Aves Island DXpedition in OPDX.1188, the information was taken down off the Web. Edwin, YV5EN, apologized to OPDX and the DX community for the info and states he was "testing the YV0AI QRZ.com page. It was on the Web just about 3 minutes just for testing purposes. Now I'm testing the page in a personal domain which is very different than the QRZ.com. There is no official info at this time and no specific date known, but the Radio Club Venezolano is working very hard on it. Hope YV0 will be soon on the air, but it depends on Venezuelan Navy. Now that everybody knows the callsign, please feel free to visit QRZ.com for any news. Sorry again if those 3 minutes of Web testing makes all the Ham community feel so angry or sad. Again, it was just 3 minutes for testing purposes...."
