REALTIME BAND CONDITIONS WEB SITE <<http://www.bandconditions.com>>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPP, QRPE and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.

TC100, TURKEY (The Goncasuyu Project). About the Project [edited] -- The historical legendary wireless station Goncasuyu played a significant role at the Çanakkale Sea Warfare, followed the radio telegraph messages of enemy naval forces and informed the Turkish bastions. After 100 years, Goncasuyu has been re-engaged by TRAC (Amateur Radio Society of Turkey) to share our peace messages with the world. Goncasuyu salutes the world with the HAM lingo 73! meaning Best regards!

The project has been planned by TRAC in the memory of Mehmetcik (a poetic term for Turkish soldier) and his epic battle. The story of Goncasuyu will be shared with the visitors at the field and with the radio amateurs of the world on the air. The following nine amateur radio callsigns will be used among the Project at the operation dates between March 14th and April 26th, and August 6-10th: TC100GS, TC100GP, TC100KT, TC10VKZL, TC100A, TC100E, TC100TC, TC100B, TC100K and TC100GLB.

Ten locations are planned for operations. Five stations at the Gallipoli Peninsula are: Goncasuyu (Rumeli Bastion), Kilitbahir, Abide (Monument), Kocaçimentepe and Anzac Bay. The other five stations at the Çanakkale (Anatolia side) are Canakkale University 18 March University area (fortress in the land war), Esenler District, Lapseki, Çardak and Canakkale Downtown).

TRAC Branches and radio amateurs from Australia and New Zealand have been invited to the field studies. HAM related visitors will be hosted by TRAC and operations will be organized and performed with the participants. You may follow this web site for further information, news and announcements.

All information and calendar are at: <http://www.goncasuyu.org/?lang=en>
