DX NEWS by

Bouvet Island by ON4WW

After press release #3, I was optimistic in terms of securing the required funding for my expedition. Thanks to so many of you, the necessary up-front expenses were getting close to being covered by the pledges received at that time. I was also hopeful that the larger DX associations and foundations would step forward to contribute as we were getting close to realization.

At this point in time, I have no other choice than to report that the funding is not sufficient to move forward.

As I am sure you know, there are a number of large DXpeditions being arranged for late 2015 and early 2016, and they are more or less competing for the same resources. I didn't manage to create sufficient interest among potential external (non-ham) donors, and my one-man concept is of course somewhat controversial by nature. Though, I am still convinced that – even if my particular approach is not necessarily the solution – future DXpeditioning has to find other forms in order to remain sustainable.

North Korea update by Dom 3Z9DX

Last few months 3Z9DX has received many emails asking about the possibility of an additional operator (CW) going with him to P5. To be clear, it's Dom's dream for a CW op to join, but at this moment only SSB will be used. Currently, there is no negotiations or ongoing dialogue about CW. Please understand this is the first step to opening doors for future P5 expeditions and it's not helpful to "complain" about type of mode, antenna choice or how much power will be used since its military personnel and local administration who make these restrictions. Please, no more requests about CW. In addition, a website will not be available until the final meeting with the telecoms department in December. The next Press Release will also be issued in December upon his return from North Korea.
