60 METERS NEWS (New Countries).....

- * VP8STI & VP8SGI - This is the first time 60m has been close to the Antarctica Circle. The co-leaders are as excited about putting this new one on 60m. - * T42US CUBA - Just a reminder that this new country on 60m will be on the air October 21st, 22nd and 23rd until 23:59Z. Then they will be back on October 26th and 27th (closing down late afternoon on the 27th). For more details, see the T42US Web site at: <http://www.t42us.com>

KH5, PALMYRA (Press Release #4 - Dated October 7th). [edited] Callsign for Palmyra 2016 announced! -- After many months of planning, securing permits and negotiating contracts with U.S. Fish and Wildlife and the Nature Conservancy, we are quickly approaching the much anticipated DXpedition to Palmyra, KH5-P. The Team is excited to be able to activate this much needed entity. Palmyra ranks in the top ten of the Most Wanted List and #2 in Europe! Palmyra 2016 call is K5P!

Co-leaders Craig/K9CT and Lou/N2TU, have formed a very experienced, highly qualified Team of 12 operators and plan to operate five stations over a 14 day period, January 11th through January 26th, 2016. Palmyra (KH5) ranks #9 on the Most Wanted List and #2 in Europe.

As with other DXpeditions of this magnitude, this is an expensive adventure. Location, transportation, island costs, and other logistics make Palmyra a costly operation.

Critical to major DXpeditions are the immediate, up-front commitment costs. Before the DXpedition begins, all equipment must be secured, pre-tested, and shipped to Hawaii where it will then be organized for forwarding to Palmyra.

The DX community has been very supportive of this much needed DXCC operation however, we are requesting additional financial support. We have a large payment due on November 1, and are short of our commitments. No matter how large or small the donation, every bit helps. Please do not wait until the operation is completed; most of the expenses are up-front and your support is urgently required now. Future permission to operate on Palmyra Atoll may not happen for many years as access is severely restricted.

Please visit our Palmyra2016 website to make your donation at:

REALTIME BAND CONDITIONS WEB SITE <<http://www.bandconditions.com>>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPP, QRPE and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.

A multi-card color QSL with island scenes similar to the QSLs for their recent CY0 operations is planned. WA4DAN will handle "Direct" QSLs. AA4VK will handle requests via the OQRS service, at <[QSLNow.com](http://www.QSLNow.com)>, developed by Randy, N0TG. Until a dedicated PY0F website is created, updates will be posted at <<http://www.AA4VK.com>> and at the various DX bulletins.

RSGB NEWS (The future of the Radio Society of Great Britain's IOTA Program). Press release dated October 10th [edited]: Islands on the Air (IOTA) celebrated its 50th anniversary as a premier DX program in July 2014. The last fifty years have seen the program grow to 2,500 active island chasers and approximately 15,000 more casual participants. It is perhaps second in scale and scope to the DXCC award; indeed, many would argue it is even more challenging than that program.

Last year the Society's Board identified a number of challenges that the program faced, not least of which was the need to provide an IT system that would allow online island credit submission akin to Logbook of the World (LoTW). Since that time, a small group of IOTA enthusiasts has been working with the Society to ensure that the IOTA program continues to grow and play the prominent role that it has done in Amateur Radio DXing and contest activity for the last fifty years.

That work has now come to fruition and we are pleased to announce that a new organization will be formed, to be called the IOTA Foundation. It will be run by IOTA enthusiasts and will manage the IOTA program in partnership with the Society. One major task for the new organization will be to develop a new online credit system that is due to be completed in 2017.

Roger Balister, G3KMA, Bob Barden, MD0CCE, Cezar Trifu, VE3LYC and Johan Willemsen, PA3EXX, are the team who will implement the IT changes and form the IOTA Foundation, with representation from radio amateurs at home and abroad..... Heather Parsons, RSGB Communications Manager

REDEFINED Q-CODE BORN TO MAKE TRAFFIC SMOOTH AND MARK LOST SOULS

What a wonderful occasion it was when DXers in Italy gathered in Rome to celebrate a new Q-code, to get together for a fun evening and to work hard on a DX University paper and questionnaire relating to TX3X due for release soon. Also, Martti, OH2BH was honored to activate HV0A on both days of the weekend. See www.ariroma.it/wp/?p=2567

A redefined Q-code (QTX) is promoted to communicate the state of affairs clearly from both ends of the DXpedition circuit. The approach was renamed "DX CHASE: IT TAKES TWO TO TANGO".

The new meaning of QTX

When a DXpedition operator clearly spells out a callsign and a number, it simply means that a targeted station should stop transmitting for a specified time period, say 1 hour, and then come back with a retuned method and mind. Alternatively, a DXer can send QTX with band and time to a pilot station indicating that a specific DXpedition operator's

efficiency and throughput - the rate, that is - has reached a point where the DXpedition operator cannot handle the task at hand, so much so that it all results in a chaotic situation. The DXpedition management folks should then act accordingly to deal with this unfortunate operator.

The original definition of QTX

This is the original definition of QTX: Will you keep your station open for further communication with me until further notice (or until.... hours)? I will keep my station open for further communication with you until further notice (or until....hours).

The new QTX code was released on exactly the same hour at the ARI DX summit in Rome, Italy and the RSGB Convention in the UK.
