DXCC NEWS. Sharon Taratula, ARRL Awards Branch Manager, reports that  
the following operations are approved for DXCC credit:

3W3MD/p -- Vietnam (Cham Island, IOTA AS-162); 2015 Operation

EA8, CANARY ISLANDS. Operators Andrea/IK1PMR and YL Claudia/PA3LEO will  
once again be active as EA8/homecall from Tenerife Island (AF-004) between  
December 9th and January 10th (2016). Activity will be on 160-6 meters  
using CW, SSB and RTTY. QSL via HB9FKK (preferred) or their home callsigns,  
by the Bureau, direct, or E-mail requests for Bureau cards. Also via LoTW  
and Clublog. For more details and updates, see: <http://www.ik1pmr.com>

EF8, CANARY ISLANDS. Juan, EA8RM, will be active as EF8U from the Las  
Palmas Contest station during the CQWW DX CW Contests (November 28-29th)  
as a Single-Op/All-Band/Low-Power entry. QSL via LoTW.

Reunion Island between November 22nd and December 1st. Activity will be  
on 160-10 meters using CW. She will also be active during the CQWW DX CW  
Contest (November 28-29th). QSL via her home callsign.

FT5X, KERGUELEN ISLAND. Gildas, TU5KG, will once again be active as FT5XT/mm  
around the Kerguelen area. However, he is expected to be on the island  
sometime in early 2016 signing as FT5XT. Gildas is captain of a fishing  
vessel and is expected/usually sails around the Kerguelen area for about  
3 months, but his activity is sporadic (sign FT5XT/MM). QSL via F4DXW.

HK0, SAN ANDRES AND PROVIDENCIA (Update). Martin, LU9EFO, will be active  
as HK0/LU9EFO from San Andres Island (NA-033) between November 11-17th.  
It was announced this past week that Faber, HK6F, will now be joining  
Martin, and will be signing as HK0/HK6F. Activity will be on 40-10 meters  
using SSB. Remember to look for activity before and after Martin's HK0

at 200 ft. for 80 meters. Thailand radio rules continue to limit hams to  
the bottom 25 kHz of 80m. This will be a good chance to get HS on 80m,  
but you have to look for ZIA all hours in the contest, not just the last  
hour. QSL via LoTW only.

REALTIME BAND CONDITIONS WEB SITE <http://www.bandconditions.com>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPp, QRPe and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.

PU0R/PY0R, FERNANDO DE NORONHA ISLANDS. Operators Renner/PY7RP and Marenga/PU0FDN will be active as PY0R/PY7RP and PU0R/PU0FDN from Atol das Rocas (SA-038) between November 15-21st. This is a rare IOTA DXpedition, and also valid for DXCC for ARRL awards as PY0F. The last operation was in 1992, and it is now in 3rd place in the most wanted IOTA groups in SA. The actual dates are only estimated since the operation depends on sea conditions. Operations will **\*NOT\*** be full-time due to other activities during their stay. As the demand is pretty high, their efforts will be to provide the 1st QSO to as many stations as they can. To achieve that, they will focus on 40m, 20m and 15m, and only one QSO with each station will be confirmed by a QSL card. Clublog.org will manage the QQRS as soon as the DXpedition finishes, and the "Leadership score board" feature will not be available for the same reason above. Due to electrical power limitations, they will run low power (100w) from an IC7000 and mono-band verticals over the salt-water. Due to high costs involved, donations are much appreciated. QSL via direct or QQRS/Clublog (No Bureau cards). For more details and press releases, watch: <http://www.py7rp.com/rocas2015>

It was reported on November 4th: "Rob, N7QT, and some of the other Pacific Northwest group will be departing for Australia on Friday afternoon. All of the group is excited about the trip. They have corrected problems on the 160m antenna that Rob used while on E51."
