NCDXF PRESS RELEASE (NCDXF Announces Publication of Martti Laine, OH2BH, Article on Working DX Pileups -- dated November 20th) [edited]: The Northern California DX Foundation is pleased and proud to announce that it has published a Special Edition of the NCDXF Newsletter consisting of an article by legendary DXer and DXpeditioner Martti Laine, OH2BH, on working DXpedition pileups. Martti's article, entitled It Takes Two to Tango, reflects Martti's lifetime of DXpedition experience, including the activation of 12 all-time new entities, and sets forth his thoughtful advice and reflections on how best to handle the pileups of DXers calling from Europe as well as other parts of the world. In today's environment of stations calling out of turn and deliberate QRM, Martti's advice could not be more timely and is destined to improve and enhance the DX experience for all. The article is available at the NCDXF website <www.ncdxf.org>.

NCDXF is pleased to make this article available for all. Since its founding in 1972, NCDXF has become the premier DX foundation in the world and has funded major DXpeditions to many Most Wanted Entities. In many cases, the NCDXF grant has made possible the successful activation of these rare entities. NCDXF is supported by amateurs around the world who believe in our mission of supporting DXpeditions to rare entities. The credit for the grants made by NCDXF goes to the NCDXF contributors, individuals and clubs, who make our grants possible. Have you contributed yet?

REALTIME BAND CONDITIONS WEB SITE <http://www.bandconditions.com>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPP, QRPE and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.

VP8SGI/VP8STI DXPEDITION NEWS (Press Release from the Intrepid-DX Group VP8STI/VP8SGI Team). Paul, N6PSE, sent out the following on November 17th [edited]: The VP8STI-South Sandwich, VP8SGI-South Georgia and VP8IDX (Falklands & /MM) licenses have been issued and are in hand. In just six short weeks, the team will be making their voyage to South Sandwich Island. Our ship, the venerable RV Braveheart, is being prepared and loaded for her long voyage halfway around the world to meet the team in the Falkland Islands.

We expect to land at South Sandwich and begin operations sometime on January 17th if sea conditions and weather permit. After ten days at South Sandwich, we will break camp and voyage three days to South Georgia. We expect to land and be on the air on February 1st.

This is a Pure DX Dxpedition. The team is not mountain climbing or collecting specimens, our sole focus is getting you in our logs! We will work very hard to do that!

To date, we have raised \$153,500 from the global DX Community. The 14 team members have contributed \$210,000 towards our entire budget of \$425,000. If your club or you yourself have not already donated will you please consider a donation? We cannot get there without you!

The Intrepid-DX Group is an IRS approved 501.C.3 non-profit organization and your US contributions are tax deductible.

Please watch for updates and announcements in The Daily DX, DX-World, DX Coffee and DX News. [ed. Also the OPDX Bulletin]
