REALTIME BAND CONDITIONS WEB SITE <http://www.bandconditions.com>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPP, QRPE and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.

S79KB QSOS PIRATED. Kasimir, DL2SBY, informs OPDX that he has been receiving many QSL cards for 2014 S79KB operation which were not listed in his log. He states [edited], "On October 13th, 2014, I was QRV on 10m SSB until 13:20 GMT and after many of the European OM's started to call like crazy (chaos) I decided to switch to RTTY. I announced this as well on the frequency. Meanwhile, somebody started operating under my (S79KB) callsign continued to make QSOs for about an hour. You can see it on the DX-Cluster (spots) that there were QSOs on at the same time for SSB and RTTY. So ALL QSOs from October 13th, 2014, from 13:20 pm - 14:30 pm on SSB are NOT valid. Please do not send me any QSL's for this time / mode. All OQRS, direct and Bureau QSL requests have been answered.

Bernard will head back to Canberra (VK1) before going onto New Caledonia

(FK) between January 30th and February 11th. He will go back to Sydney, between February 14-15th, before going back to France. QSL via his home callsign.

VK9N, NORFOLK ISLAND. Doug, VK4ADC, will be active as VK9NU from Norfolk Island (OC-005) for 9 days on a holiday trip starting April 23rd. It will not be a true DXpedition, so operating times may be sporadic. Equipment will be an Icom IC-7000 (100w) plus a LDG auto-tuner and switch-mode power supply. Antenna will be either a multi-band dipole / inverted V covering 80/40/20/15/10 (and possibly 60m) or a vertical wire. QSLs should be sent direct to his home address (a couple of green stamps should be included for the return card) or via the VK Bureau with VK4ADC clearly marked on the card. VP8SGI/VP8STI DXPEDITION NEWS (Press Release from the Intrepid-DX Group VP8STI/VP8SGI Team). Paul, N6PSE, sent out the following on December 31st [edited]: Greetings from the Intrepid DX Group VP8STI/VP8SGI Team -- We are pleased to report that the R/V Braveheart has arrived in Stanley, the Falkland Islands and is making preparations for the arrival of the VP8STI/VP8SGI team. The Braveheart is taking on 90,000 liters of fuel and enough provisions for their 36 day voyage with the Intrepid VP8 team.

At 59 degrees South, Southern Thule in the South Sandwich chain of islands is closer to the Antarctic Circle than either Heard Island (53 degrees) or Bouvet Island (54 degrees) The climate will be cold and harsh with strong winds. Current weather in Southern Thule is -2 degrees C with moderate winds. After camping in tents on Southern Thule for ten days, our team will voyage to South Georgia Island and set up camp for an additional ten days.

Our goals are to operate fast and efficiently and to provide as many all-time new contacts with these rare entities. We will make the extra effort to work the most remote and difficult regions.

All of our plans are going very well. We have raised 74% of the funds needed to complete our Dxpedition. We are very grateful for all Foundation, Club and Individual support.

We have updated our QSL page and OQRS will be live as soon as we complete each activation. We will make every effort to upload our logs to Clublog each day. We expect to have challenges in doing so as at 59 degrees South, Southern Thule Island is outside of the Inmarsat BGAN coverage footprint.

We are very excited to be activating the #3 and #8 most wanted DXCC entities on a combined trip. You can view all details of our Dxpedition at: <http://www.intrepid-dx.com/vp8>

Upon our return to Stanley, the team will operate as VP8IDX for five days with an emphasis on 160 meters.

Please watch for updates and announcements in The Daily DX, DX-World, DX Coffee and DX News. [as well as the OPDX]

Thank you, and Happy New Year!

Paul N6PSE, Co-Leader, VP8 Team

XW, LAOS. Bruce, 3W3B (HS0ZCY/XU7ADF/XW1B/AA4XR), who lives in Da Nang, is once again active as XW4XR from Vientiane until mid-January. Activity will be on 80-10 meters using only CW and RTTY. QSL via E21EIC and LoTW.

YJ, VANUATU (Reminder). Daniel, VK4AFU, is now active as YJ0AFU from Port Vila, Efate Island (OC-035, WLOTA 1051), until January 10th.
