REALTIME BAND CONDITIONS WEB SITE <<http://www.bandconditions.com>>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRpp, QRPe and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.

Also, check out the VOACAP predication Web page at:

ZD7, ST. HELENA ISLAND (ZD7VDE Postponed Again!). Bill, G0VDE, reports that the opening of St. Helena airport still has "continuing serious problems" and "it is still not possible to land sensible sized aircraft like 737 there". He states, "The planned flights (in May/June and October by Atlantic Star) have been cancelled. The Comair flights from South Africa have likewise not started. All in all, it is a total mess and the UK government is being accused of building a £250 Million white elephant of an unusable airfield, all due to the strong winds and wind shear! I have had to cancel, re-book and cancel my accommodation - if you read the ZD7 'newsletters' (the St. Helena Sentinel and the St Helena Independent) you will see it has been a very sorry story - hotels were encouraged to prepare extra rooms for the coming 'tourist boom' and one has even reportedly gone out of business, because they spent a lot to prepare and have now got no means of recovering their losses!"

Bill states, "So I am afraid I am not going this October either (having had to cancel my May/June trip). I am keeping somewhat up-to-date about the events on my website <sthelenadx.com> - but there is no planned date for the full airport opening so I don't have any certain future date. You may know the boat (the RMS St. Helena) was due to retire at the end of July, but it has been kept in operation for about another year as it is obviously the only way of accessing the island. I am looking at the possibility of travel-
ing by the boat, but the problem there is two fold - the cost is at least double the planned cost of flying, and I would have to travel for two weeks and only be able to stay for one week... It is just possible I will take this option, but I am still waiting as I could theoretically fly at quite short notice, should proper flights begin. We therefore have sorry situation

and a continuing delay - I will try to keep everyone posted. Maybe the only silver lining is that ZD7 will get rarer and any future visit would be popular!"

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K6GS and N0TG for the following DX information.

7P8, LESOTH0 (Press Release). Gene, K5GS, sent out the following press

release [edited]: Pista, HA5AO, arrived in Maseru, Lesotho, on the afternoon of Friday, October 14th, with 4 suitcases weighing over 110 kg (242 lbs) of radio equipment and gifts for the orphanages where he is a volunteer.

He began setting up the station and antennas on Saturday and will finish on Sunday. The noise levels are S2-3 on the higher bands, but S5-6 on the low bands. He has an appointment on Monday with the Lesotho Communication Authority to pick up the license.

He has written confirmation that a special call sign, 7P8EUDXF, may be issued celebrating 30 years anniversary of "European DX Foundation" (EUDXF).

At this time he does not plan to use 7P8AO, just depends on what is actually issued on Monday.

He hopes to be on the air starting Monday, October 17th, for at least 10 days - look for him on CW, late afternoon and evening/night. Blackouts are frequent, usually 15 minutes to 1 hour. If he unexpectedly disappears without sending QRX or QRT it is possibly due to a blackout.

There is Internet access, he will upload logs daily to OQRS on - <HA5AO.com> - he will operate as much as possible.

He begins working on his humanitarian projects at the orphanages on Tuesday..... 73, Gene K5GS for Pista

CY9C ST. PAUL ISLAND DXPEDITION (Press Release/QSL Status). Randy, N0TG, sent the following press release [edited]: QSL cards have been sent to the printer. We estimate to start sending cards in next 3 - 4 weeks. LoTW has been uploaded. Unfortunately, and mysteriously some data did not upload to LoTW. We will investigate that and see what can be done after we get finished with the distribution of QSL cards direct and Bureau.
