<https://pskreporter.info/pskmap.html>

Callsigns to look for are FG/W2LNX from Guadeloupe, FM/W2LNX from Martinique and either J6/W2LNX or J68LNX in St. Lucia. He plans to operate almost exclusively PSK31 or PSK63 using a KX2 QRP radio with a Buddipole full size 20m vertical antenna. Also, he will bring two bobbins of wire to make a 30m or 40m dipole or inverted Vee. For QRP work, David plans to find some mountain tops. When he has electric power, he plans to use a Hardrock-50 50 watt amplifier that Marc, N4DR, built for him. He does mention, "I will be casually operating for no more than one or two hours a day. I will be with the missus on Guadeloupe and Martinique and I don't want to irritate her too much with my ham radio stuff. On St. Lucia, I should have a bit more time. I still don't know my callsign is yet in St. Lucia, but I received an invoice from the St. Lucia ministry. So my application has been approved. The callsign will be J6/W2LNX or J68LNX, probably J68LNX since it is a renewal application." OF9X UPDATE (Press Release) [edited]:

SANTA HUNT -- OF9X ACTIVE FROM DECEMBER 01 THRU DECEMBER 31, 2016

SANTA RADIO, OF9X IS INTRODUCING THE HARD WORKING TWELVE (12) ELVES

As for many years Santa is now setting up for his world tour - including Amateur Radio -- and will provide your family an added pleasure for this Christmas. The exciting news is that for the first time in the history of OF9X, Old-Father-Nine-Christmas, and the elves will step forward so that you can get to know them and their part in the Christmas scene. And better yet, you can make an effort to find them together with your young ones whether within your family or in your immediate neighborhood.

There are twelve elves operating OF9X and they indicate themselves with the 3-letter identity thus your maximum elf-multiplier can be twelve (12).

You should try to work them on all amateur bands and modes (CW/SSB/DIGI from 630m to 70 cm) and each QSO would give you a one-point (1). If you are outside of Europe your points are doubled (2). Summing up the QSO points and multiplying them with contacted number of elves makes your Frozen Santa Bag, the final score. Only 2016 QSOs are valid for the Bag.

If you miss the elf identity for whatever reason no problem as you can send your QSO listing to Santa HQ and these elves would count them for you. [<santapoints@sral.fi>](mailto:santapoints@sral.fi); you can also look for your QSOs at the ClubLog and each slot may illustrate the elf you had contacted.

Here is your slate of elves:

Arto, OH2KW (ART); Arttu, OH2FB (ATU); Jyri, OH2KM (JYR);
Martti, OH2BH (MAR); Niko, OH2GEK (NIK); Pauli, OH5BQ (PAU);
Pekka, OH2TA (PEK); Pertti, OH2BEE (PER); Raimo, OH2BCI (RAI);
Tom, OH6VDA (TOM); Pertti, OH2PM (SIM) and Erik, OH2LAK (LAK)

Your efforts will be rewarded by Santa Awards with the following awards:

A: SKC- Award (Santa is King of Christmas); minimum of 50 points
B: WMC - Award (Warm and Memorable Christmas); minimum of 35 points
C: RNS -Award (Remember those Red Nose Elves); minimum of 20 points

The full-color awards will be sent by email if you send your log and your point calculation to [<of9xawards@sral.fi>](mailto:of9xawards@sral.fi) by January 05, 2017 - please also include the name to be printed on the award and the email address the awards should be sent to.

High scoring stations with their children in each continent will be offered an opportunity to have a two-way conversation with true and live Santa during the Christmas week. More details on this will be presented at [<OF9X.QRZ.com>](http://OF9X.QRZ.com) where Santa video/audio screening will take place.

May this Christmas be a good one for all children of the world.

REALTIME BAND CONDITIONS WEB SITE [<http://www.bandconditions.com>](http://www.bandconditions.com):

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRpp, QRPe and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the POLSAR system used by NASA.
