REALTIME BAND CONDITIONS WEB SITE <http://www.bandconditions.com>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPP, QRPE and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the POLSAR system used by NASA.

SILENT KEY. Members of the Northern Ohio DX Association were saddened this past week to learn their long time Vice President Dwaine Modock, K8ME (ex-WA8MEM), became a Silent Key unexpectedly late Saturday evening on March 11th, at the age of 68.
