3B8, MAURITIUS. Hans, PA3HGT, will be active as 3B8/PA3HGT from Mauritius (AF-049) between September 5-22nd. Activity will be holiday style on 40/20/10 meters using SSB and possibly some Digital modes. Equipment will be an Icom IC7100 into an Endfed antenna. QSL via his home callsign, direct or by the Bureau. Possibly LoTW (experimental).

3Y0Z BOUVET DXPEDITION (More on the 160m Vertical). Tim Duffy, K3LR, reports: The DX Engineering and Bouvet Island teams have worked together to design an efficient 90 foot top loaded 160 meter vertical antenna that can be installed quickly and safely on Bouvet Island by the 3Y0Z team this January.

With a good radial system the difference in gain between a 120 ft (full quarter wavelength) vertical and this custom 90 foot top loaded vertical is less than 0.5 dB.

This vertical uses a custom designed heavy duty hinged pivot base with base insulators to accommodate a 40 foot falling derrick 3 inch heavy duty pipe for installation.

The vertical is base fed using two inductors to match to 50 ohms. The first 70 feet of the vertical is Universal Aluminum tower (12 inch face)

and the top 20 feet is 1.875 inch diameter aluminum tubing.

There are guys at 30, 50 and 70 feet. There are also three 30 foot top loading wires attached to the top of the tubing that are tied to anchors 60 feet out from the base.

DXE is actually donating two of these vertical packages to the 3Y0Z team in case one gets damaged (there are 300 storms per year on Bouvet).

More details on the construction and the final test raising plus VSWR measurements are shown in the video filmed and produced (in 4K Ultra) by Greg, W8WWV. <https://www.youtube.com/watch?v=bSw-0TjaUiU>

REALTIME BAND CONDITIONS WEB SITE <<http://www.bandconditions.com>>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPp, QRPe and CW/SSB for Contesters interested in increasing their scores. It can also be of

benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.

Also, check out the VOACAP predication Web page at:

P5/3Z9DX PIRATE continues to be active this past week. Reports from a few DX sources state that Dom, 3Z9DX, reports he has not talked to any DX source about his return trip to P5. He adds, "All DX spots are fake and are made by local Polish guy who is not mentally well. If you worked P5/3Z9DX recently you worked a simple clown / pirate. There is still no more information for now from North Korean officials about my return visit. In addition, at the moment, I'm concentrating on other projects for later this year and 2018."

SPECIAL EVENT (Highway to a DX Party!). The Citrus Belt Amateur Radio Club of San Bernardino <w6jbt.org>, California, is once again hosting (probably one of the most fun special event activities) the 18th annual "Route 66 On The Air" special event between September 9-17th. The purpose of this event is to offer amateur radio operators a fun way to "Relive the Ride" of their own memories of Route 66, and to celebrate the highway's 91st anniversary. The U.S. Highway 66 established in 1926, was the first major improved highway to link the west coast with the nations heartland. Through stories, songs, and TV shows, the highway came to symbolize the spirit of the freedom of the open road, inspiring many to see America. Look for the following 21 stations (two are rovers) operating in or around the major cities along the old "Route 66" from Santa Monica, California, to Chicago, Illinois:
