3B7 DXPEDITION NEWS (Press Release #3, dated October 20th). Our last communication goes back to several months but we didn't stay inactive! All tasks are going as scheduled.

The logistical operations are going on and will soon be finalized. Transport to St. Brandon has been secured by a 50% deposit. It will be a 24h journey by boat between 3B8 and 3B7.

Once on the islet, we'll use the small fishermen's building as radio shack rather than tents. For sure it will be much more comfortable especially with high temperatures. We are working to get a reliable 24/24 electricity supply by generators. We already started to test, and pack all our equipment in the crates previously used for Tromelin and Juan de Nova.

Expert Electronics LLC provided us some of their famous SunSDR2 PRO transceivers. We already have tested this setup with success on Juan de Nova. Now, these SDR TRX will play a major role in our expedition. Thanks also to our regular corporate sponsors Dx Engineering, Messi & Paolini, Spiderbeam for their continuous support. We will give you more details about our setups soon.

We already made important expenses and time has come to request assistance from the DX community. Last week, we have contacted many clubs and associations who already supported us in the past. We are delighted to receive already positive answers!

As usual, we are extremely careful with each expenditure, but such project remains expensive. The team will provide more than 50% of the budget, but

we need your assistance to balance it.

3Y0Z DXPEDITION NEWS (Press Release #9, dated October 17th) [edited].

After over 10 years of dreaming and 2 years of rigorous planning, we have turned a page. Our team is intact and ready. We have 17,000 pounds of equipment. It has been tested, sorted, inventoried and packed into our 40-foot sea container. We have discussed all conceivable contingencies, including rough seas, clouds and fog, high winds and emergencies at sea and on shore. We have studied propagation, maximized our location on the island, selected the best radio equipment, and have thought first and foremost of safety. All of this culminated when we sealed our sea container on October 9th, entered it into customs bond, placed it on a truck and watched it begin its journey to Punta Arenas, Chile. Our die has been cast. Now, a new chapter begins: one of reflection, waiting anxiously and hoping (praying) that all will go well from this point on.

We have been blessed by the worldwide support of individual amateur radio operators, clubs and foundations. They have backed us, overwhelmingly. We are inspired by the support we have received, both financially and in spirit. We want to live up to all that is expected of us on this "generational" DXpedition, which is likely the largest and most challenging DXpedition ---- ever. Indeed, there may never be another like it. We now have time to appreciate the responsibility that this project thrusts upon us. We feel it, and we will do our utmost to meet the DX world's expectations from Bouvet - the number 2 "most wanted" entity.

You will start seeing band plans, more detailed propagation information, QSL information and more on our website. Our Facebook and Twitter social media outlets will keep their conversational tone, but shift their focus to how you can best work us, plus current events and news of interest. Our updated propagation forecasts continue to validate our predictions, as visualized on our website propagation page.

Our team now has a singular focal point, King George Island, where the next chapter begins. We will meet our ship there on January 13th, and sail 2,200 miles to Bouvet. By departing from King George Island rather than Punta Arenas, we save about 400 miles of sea travel. This essentially gives us one or two more days on the air from Bouvet. We will savor those days, because they will give us QSOs that otherwise would not have been made.

We have asked more from our team members than for any previous DXpedition. This includes their time, effort and money. We thank all of you who are helping to defray some of their costs. We continue to welcome new and additional support to help with these expenses.

We are counting the days.....

4S7-LAND AND THE CQWW SSB WITH A CUP OF CEYLON TEA -- 4S7AYG (UR0MC/UT5UY), 4S7BHG (OH2BE/OH2BH) and 4S7KLH (R3XA) -- The Daily DX News of October 13th suggested that Sri Lanka is the place to be for the CQWW SSB Contest. So right they were that three visitor stations will be penetrating the scene for a week, including the days prior to the contest weekend. This semi-rare scenic island with its natural beauty is indeed the place to be now and in the future, as their tourism offering is well established with a line-up of fine hotels in full operation. How about a trip to Cinnamon Island, the true home of highly-desired Ceylon cinnamon along with those rare ones in IOTA AS-171.

Ham Radio Tourism (HRT) is indeed well-established in many places around the world. Now Sri Lanka joins those ranks from zone 22 in the Indian Ocean, seven (7) degrees North of the equator. <https://www.hamtourism.com>

As an introduction, you can try to work all three stations during the week of October 23rd and be eligible for the Ham Radio Tourism Award (HRTA), which features those long beaches and unforgettable landscapes of Sri Lanka. And enjoy a cup of famous Ceylon Tea while doing all this. Your list of QSOscan be submitted to: [info@hamtourism.com](mailto:info@hamtourism.com). There the award is at no cost by pdf-email.

NCDXF NEWS (Press Release, date October 16th). NCDXF announces major support for the KH1 Baker Island DXpedition [edited] -- The Northern California DX Foundation is pleased to announce it will be a major contributor to the KH1 Baker Island DXpedition planned for June 2018. Baker-Howland is #4 on the ClubLog Most Wanted List now, but will be #3 after the upcoming Bouvet DXpedition.

In 2016, NCDXF-supported DXpeditions activated five of the ten most-needed entities. These DXpeditions put nearly 500,000 QSOs into DXer's logs! That year we spent \$156,000 to fund these and other DXpeditions. It is possible that the Bouvet and Baker DXpeditions could add another 200,000 QSOs to that number!

[www.baker2018.net](http://www.baker2018.net) has details of the KH1 Baker DXpedition.

DXpeditions to rare entities like Baker-Howland that are so remote are becoming more expensive, a trend that we believe will continue.

NCDXF's primary purpose is to help fund well-organized DXpeditions to rare, difficult and expensive entities, like Baker Island. During the last 45 years, NCDXF has granted over \$1.1 million to hundreds of DXpeditions - helping to put an "all-time-new-one" (ATNO) in the log and make DX happen for thousands of DXers worldwide. The credit for these large grants goes to the NCDXF contributors, individuals and clubs who support the DX community. Without those contributions, DXpeditions to entities like Bouvet or other rare locations would not be possible.

If you agree with the importance of NCDXF's work, and if you are not a current contributor, we hope you will become one today by clicking here:

[http://ncdxf.org/pages/join\\_renew.html](http://ncdxf.org/pages/join_renew.html)

Your contribution will continue to help make DX happen. You can also support future DXpeditions by including the NCDXF Cycle 25 Fund in your estate plan <http://ncdxf.org/pages/estate.html>.

We wish the KH1B team a safe and very successful trip to Baker Island next year.

REALTIME BAND CONDITIONS WEB SITE <http://www.bandconditions.com>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPP, QRPE and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.
