3D2EU ROTUMA DXPEDITION (Update). It was reported on the 3D2EU Web page [edited]: We regret to inform you, that Tony (3D2AG) will be not with our team on Rotuma, because of unforeseen work commitments. Our preparations are on schedule and in one week our team flies from Frankfurt over Singapore to Nadi. After a short stay in Nadi we will fly on Feb. 23th, with a small Twin Otter to Rotuma. And then... We will look for you in the pileup.

Few other sources are reporting that the team will now only operate from one location instead of two. Also, the team will not be operating on 60m due to Tony's absence (no permit). For more details, refer to OPDX.1342 or their Web page at: <http://www.rotuma2018.de>

3Y0Z BOUVET DXPEDITION NEWS (From 3Y0Z Web page). Reported on February 14th, at 1645 UTC: We continue our slow pace toward Capetown. We are currently making 5.6 knots and are 293 miles from Capetown. We are showing 2 days and 5 hours until we reach Capetown.

The weather is pleasant. Our seabirds have decreased in number since we left cooler waters. Recently, a pod of Orcas passed by, and the bridge spotted a whale. Those were the highlights of the day. There's not much

left for us to do. We have one /MM radio to occupy the 20 of us.

It's a bit difficult to arrange and confirm our flights home and to prepare for Customs/Immigration in Capetown without the internet, but we are managing - sort of.

Thanks again to everyone and the good wishes we encounter on the air. The "dit-dits" are appreciated.

73, Ralph, K0IR

Reported on February 16th, at 1320 UTC: ETA at Capetown harbor is 0930 on Saturday morning. We understand that immigration and customs will come aboard at 1700, and we will likely be cleared to depart the vessel. DAP has us all booked into a local hotel near the waterfront.

On Sunday, there will be a reception held at a local yacht club sponsored by a local radio club and numerous DXers. We are very much looking forward to that and are certainly honored.

The first of the team will begin departing for home on Sunday night, and the majority will be on their way Monday evening/early Tuesday morning. A few more will straggle out and be on their way home on Wednesday.

When we depart the vessel on Saturday, that will be our 31st day aboard the ship. Needless to say, we are ready to set foot on dry, un-moving ground once again. Ralph and I are very proud of this team. They have endured many hardships since departing home in early January. They have been patient and resilient and good company. There will be more updates in the future, as we begin to unravel this attempt and plan our subsequent strategy.

73, Bob, K4UEE

KH1/KH7Z BAKER ISLAND DXPEDITION (PRESS RELEASE #5, dated February 15th).

[edited] The 2018 DXpedition to Baker Island is proud to commemorate the 81st anniversary of Amelia Earhart's disappearance on July 2, 1937, near Baker & Howland islands, as well as the commitment and sacrifices made by the Hui Panala'au students from Hawaii, who lived on Baker, Howland and Jarvis from 1935-1942.

Not many people know that these "Hui Panala'au students" were unsung heroes. They were part of the American Equatorial Islands Colonization Project, which helped establish Baker, Howland and Jarvis as legitimate US territories by forming settlements on Baker and Howland.

The settlement on Baker was named "Meyerton", after Captain H.A. Meyer of the US Army, who helped establish the Hui Panala'au camps in 1935. "Itascatown", on Howland Island, was named after the USCGC ship "Itasca" which transported the students to the islands from Hawaii. Some of these young men lost their lives during the simultaneous attacks on Pearl Harbor & Baker-Howland-Jarvis on December 7-8th, 1941.

There is a strong connection between Earhart's trip around the world, and these Hui Panala'au colonists. The students helped build the landing strip on Howland for Earhart's arrival and were waiting to welcome her on both Baker and Howland.

Itasca was anchored at Howland and was in constant communication with Earhart as she made her final approach to Howland, but then disappeared presumably in the vicinity of Baker-Howland, which are only 40 miles apart. From some reports, a few students were also on the Itasca during those final hours.

Our DXpedition not only honors Earhart, often cited as a role-model for young girls because of her independence, persistence, and courage, but also recognizes the important role the brave young Hui Panala'au students played in US history.

KH1 is the 5th most wanted entity. Our plans are to bring the KH1 entity to as many operators, and countries as we can. We hope adding these historical elements to our adventure makes it more interesting and enjoyable to our audience and raises awareness of our hobby in the general public.

As with any DXpedition to the really rare ones, this will be another large budget operation. The operator team will contribute over 50% of the expected budget of \$400,000. You can help make this DXpedition happen by visiting our website and contributing today.

REALTIME BAND CONDITIONS WEB SITE <<http://www.bandconditions.com>>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPp, QRPe and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.
