*** SPECIAL NOTE FROM EDITOR: It seems everything is back to normal from the ISP Hamnet.org server for the OPDX's mail and mailing list. Users of the server found out that the server machine had been moved to a different host, and there were some firewall settings that needed to be entered. Also, there was a problem with some individuals (+350) being knocked off the mailing list and hopefully that has been corrected. The individuals that were knocked off the mailing list have been re-added..... 73 de Tedd KB8NW

REALTIME BAND CONDITIONS WEB SITE <http://www.bandconditions.com>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPP, QRPE and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.
