The latest update (April 7th) as reported on their Web page states[edited]:

"The South island exceeds so little of the horizon that it is necessary to wait for the last moment to discover how beautiful it is when the boat approaches it finally. It was mid-afternoon yesterday, so we finally reached Flo, F5CWU, and Pasal, F5PTM, arrived earlier with the first boat trip. After a 26 hours boat ride, we were also very happy to have a meal before continuing immediately. Our two friends of the 'pre-team' had already set up all the VDAs and the 30m Four Square. We took advantage of the last hours before the night to install the 40m Four Square. We also hoped to complete the installation of the 160m antenna to start during the first night, but the wind decided otherwise. At the end we installed the stations during the night and began operating just after. Despite the fatigue of the first day, the operators took their turns all night long and more than 3000 qso were in the log early in the morning.

For this new day, the installations of the remaining antennas were resumed, while maintaining a maximum of active stations. The setup is now complete for both transmission and reception. The rythm will now be fully reached.

Regarding the island, it reminds us Tromelin and Juan de Nova very much, both in terms of fauna and flora. Based on these previous experiences, we have been able to avoid disturbances for birds as much as possible, and select the right areas for the antennas. Many terns incubate their eggs and toddlers barely open their eyes. It really looks like heaven.

We are fortunate to share the island with Mauritian fishermen friends who are very willing to give us a hand, and even share the results of their catch.

With this first communication also comes the first online log. We ask you to make this expedition a success by providing helpful information to our pilot stations.

Let's get the party started!" [A picture was provided]

C5, THE GAMBIA. Pedro, ON7WP, is once again active as C5WP from The Gambia until April 13th. Activity will be on 40-10 meters using mainly the Digital modes (FT8). See QRZ.com for details. QSL via his home call-sign direct only.

CQ MAGAZINE PRESS RELEASE. Richard Moseson, W2VU, Editorial Director for CQ Communications, Inc., sent out the following on April 2nd [edited]:

ARRL and CQ Magazine Announce Launch of CQ's WAZ Award
Support on ARRL's Logbook of the World

Officials from CQ magazine and ARRL, The national association for Amateur Radio®, are excited to announce the launch of support for CQ magazine's Worked All Zones (WAZ) award program on ARRL's Logbook of the World (LoTW) system, effective Monday, April 2, at 10:00 a.m. EDT (14:00 UTC).

The goal of the project was to create the proper technical support system to enable amateur radio operators to submit LoTW confirmations for WAZ credit and that has been accomplished, say CQ and ARRL officials.

"We are very pleased that participants in CQ's WAZ award program will now be able to use their LoTW confirmations for award credit," said CQ editor Rich Moseson, W2VU. "CQ WPX Award participants have found it very

helpful and we are sure it will be equally helpful for those pursuing WAZ and its many variations."

ARRL First Vice President Greg Widin, K0GW, concurred. "Users of LoTW have been telling us for some time that they would like to use QSLs from LoTW to apply for the WAZ award. They will now be able to select confirmations to be used for WAZ credit."

Beta testing for bringing CQ magazine's WAZ award program into ARRL's LoTW system had been underway since mid-December. Any problems in the implementation discovered by testers were corrected by the technical support team. Also, the documentation has been improved by feedback from the testers. At the same time, each LoTW user was given an additional WAZ account.

Standard LoTW credit fees and separate CQ award fees will apply.

Logbook of the World is ARRL's electronic confirmation system for amateur radio contacts. It provides a confirmation when both stations in a contact submit their logs to the system and a match between the logs is confirmed. LoTW has supported the CQ WPX Award program since 2012.

ADDED NOTE: Also, check out the ARRL press release on their Web page at:

CR3, MADEIRA. Tibor, OM3RM/CT9ABN, will be active as CR3DX from Porto Moniz, Madeira Island, during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band/High-Power entry. He will be on the island between May 19-29th, so activity outside of the contest will be on 80-10 meters using the callsign CT9ABN. QSL via OM2VL, direct or by the Bureau.

CY9C ST. PAUL ISLAND DXPEDITION NEWS (Cancelled). Randy, N0TG, informs OPDX on April 3rd: "The DXpedition scheduled for August 1-9th, has been cancelled. After considerable analysis and discussions as to expected band conditions, the 'need-list' ranking significantly greater than 50, and in order for the team to achieve our goals for maximum Q's and ATNO(s), DX'ers would be better served if we postponed the DXpedition. We look forward to a future St. Paul DXpedition effort when conditions significantly improve."

DAY-XENIA HAMVENTION NEWS (Contester Related Events in Dayton). Tim, K3LR, reports the following updates/information for the HamVention:

- * Many of the Dayton contester related activities are listed on the Contest Super Suite web site at: <http://contestsupersuite.com>

REALTIME BAND CONDITIONS WEB SITE <<http://www.bandconditions.com>>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPP, QRPE and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.
