KH1/KH7Z BAKER ISLAND DXPEDITION NEWS (Press Release, dated April 11th).

The 2018 DXpedition to Baker Island is proud to announce the addition of Neil King, VA7DX to our team.

Neil was first licensed in 1979 as VE7CVM, attained his advanced certification in 1980 and acquired the call VA7DX in late 1999.

An avid HF, VHF and UHF contester, Neil has also dabbled in meteor scatter, EME, tropo and satellite operation.

Neil has had the opportunity to visit and operate from 3DA0, 7P8, VU7, TX5C, JT1, K5D, HK0, C9, A25, FT5ZM, 7Q7, A35, and TX5T.

KH1 is the 6th most wanted entity. Our plans are to bring the KH1 entity to as many operators, and countries as we can.

As with any DXpedition to the really rare ones, this will be another large budget operation. The operator team will contribute over 50% of the expected budget of \$400,000. You can help make this DXpedition happen by visiting our website, and contributing today.

<http://www.baker2018.net/pages/donate.html>

With two months to go before we board our ship in American Samoa, we thank you in advance for your support.

The Baker Island 2018 Team

KH9, WAKE ISLAND (Update). Philip, N7NVK, now active as KH9/N7NVK, reported on QRZ.com this past week On April 13th: "I am now on Wake Is. I am working out the logistics to get on the air this coming weekend (20 meters SSB) in the neighborhood of 14.225 split, listening up 5kc. Saturday the 14th (USA) at 2200 UTC. Hope the bands are favarable."

OT70, BELGIUM (Special Event). Look for special event station OT70NOL to be active on various bands using CW and SSB, between May 1-31st. Activity is to celebrate the 70th anniversary of the UBA. A special QSL will be available.

REALTIME BAND CONDITIONS WEB SITE <http://www.bandconditions.com>:

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPp, QRPe and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.
