Then on Friday, Ken posted the following on FaceBook: "Finally I got this working. No social media for 1 week. Last night I was informed that a police order has been issued preventing me from leaving TT, even w/o equipment. Status of my return flight has changed to "open". The Norwegian embassy and foreign ministry are now working on the issue. I get many emails every day from DXers around the world with kind words, it keeps the spirit up

- thanks! Hotel staff also very supportive. Still waiting."

Within 60 seconds of your contact with VP6D, the browser page is automatically updated to show your callsign, this confirms that your contact is in the log (DXA reads the VP6D log). This process eliminates the need for duplicate contacts on the same band / mode and minimizes the confusion caused by pirates or other DX-peditions operating at the same time.
