IOTA NEWS.....

AF-111. NEW IOTA! (Update) DX-World.net posted the following on October 25th: With just 10 days until the EL2EL/4* expedition gets underway, the team are pleased to report all our plans are coming together. * <https://af111newiota.com/>

You may not be aware this a 100% charity expedition - meaning all donations raised go directly to MAF Liberia* - an organization who fly the only humanitarian flight service in that country. In 2017, Liberia was ranked 4th poorest country** in the world.

* <https://www.maf-uk.org/news/islands-on-the-air>

** <http://uk.businessinsider.com/the-25-poorest-countries-in-the-world-2017-3>

Today, we are delighted to announce that 50% of our target has been raised and we thank everyone who has taken the time to donate and understand exactly what MAF do. Consider only £25 covers the cost of fuel for a 30 minute flight, then already 40 more flights have been secured through this charity expedition. Thanks a lot!

In addition to the above, we will also be bringing surplus reading glasses and mobile phones to Sasstown. We have been informed there's a real need for reading glasses in the rural elderly communities - as such simple cheap devices can transform a person's basic well-being. Equally, the simplest of mobile phones, that we all discard as being old or outdated, can open up new opportunities for rural communities in Liberia, too.

We arrive in Sasstown, southern Liberia on the morning of November 5th. Plans are to set foot on Telengbe Island (IOTA AF-111NEW) before sunset that day. We'll be QRV on 40-30-20-17-15m using a combination of VDAs and vertical dipoles, all on 100W. Other bands will be checked time-to-time should openings occur. Mostly SSB will be used with some CW and possibly FT8.

Keeping in constant touch with local villagers and elders, we can also report the seas around the island have calmed since an earlier recce* trip so landing on Telengbe Island looks very promising.

* <https://af111newiota.com/the-recce>

You might be curious why we will use /4 in our callsign. Basically, we do not have to, but to emphasize we'll be on AF-111NEW it was thought prudent to distinguish this fact. (Liberia ham radio regions map*).

* <https://af111newiota.files.wordpress.com/2018/09/screenshot-2018-09-02-at-20-33-05.png>

Note: If you work EL2JB, this will be our mainland station if there are delays in landing on Telengbe or issues forcing us to come off early.

Behind the scenes, GMDX Group and GM00BX have been very helpful. Together with Spiderbeam, we are very grateful to them all.

This is our final news release prior to departure - we look forward very much to working you!

In 2019, Daylight Saving Time (DST) will again go into effect on Sunday, March 10th, at 2:00 AM local time. ADDED NOTE: Hopefully, all amateur radio operators know NOT to change their GMT/UTC/ZULU clocks. However, since most operators usually set their computers to local time, some may have to change their settings on "some" ham radio software (ex. logging, propagation, DXTelnet, etc..) programs.

VP6D DUCIE ISLAND DXPEDITION NEWS. The VP6D team continues to be active from Ducie Island (OC-182) until November 3rd. The team has been very active on 160-15 meters, using SSB, CW, and FT8. With all the rain and storms which hampered the ability of the VP6D team to erect additional antennas, the team is still in good spirits.

The Ducie Team sent out the following late October 25th: The rain stopped and our tents and clothes are drying off.

Important Request:

We know Ducie is an ATNO for many DXers.

However, we are seeing far too many dupes. People are working us and a few minutes later working us again, the ops are getting a bit frustrated.

DXA availability depends on 2 Ducie Island networks that are subject to intermittent outage. If either network drops out DXA does not do a refresh to pick up missing calls.

Please check the VP6D log at: pdxg.net before duping us on the same band / mode. We really need your help with this request. We have at least 7 more days on the island.

VP6D will be operating the contest during CQWW SSB, good luck in the contest.

All stations are operational, all antennas are in good condition.

Thanks for your help..... Team Ducie 2018
