** PLEASE TAKE NOTE: Two weeks ago the OPDX mailing list received an usual amount of E-mail bounces (in the hundreds). The majority of the bounces were from the following ISPs: COMCAST, COX and GMAIL. We are not totally sure why this happened, but if your ISP blocks the OPDX Bulletin, please send a complaint to your ISP. If you did not receive the bulletin, there are other ways to receive bulletin. The bulletin is posted every week at the following URLs:

The OPDX (Mailing List) Archives: <http://hamnet.org/pipermail/opdx>

The weekly bulletin (issue #) is also posted (for the above URLs) on FaceBook <https://www.facebook.com/NorthernOhioDxAssociation/> and Twitter https://twitter.com/kb8nw_opdx. Let's hope this problem will clear-up. Thanks for your understanding..... 73 de Tedd KB8NW

3Y0I BOUVET DXPEDITION NEWS. The following was posted December 1st:
"3Y0I to invite additional operators -- Some fresh news from Cape Town, South Africa. The 3Y0I Team is about to deal with another extensive training next week + gathering some additional equipment we'll need at Bouvet Island. Also, new possibilities emerge: we can take 2 additional operators (CW + SSB) with us. If you're flexible operating - and weather-experienced individual, and willing to join 1-month long adventure of your life time, drop a msg asap at: k38dom@gmail.com. Be quick!"
Also, there has been several QSNs reported on the DXclusters by E51DOM/MM (mostly on FT8). This is reportedly Dom, 3Z9DX, "probably" operating from

the ship that they will use to take them to Bouvet. Dom has stated that he will use this callsign during his sailing trips to several different locations in the World and "probably" on his way to Bouvet.

Departure dates are still not known. It is still a mystery... Remember, they plan to stay on the island for at least 2 weeks, if the weather cooperates. The 3Y0I DXpedition's band plan frequencies (160-6m) and modes (CW/SSB/FT8) can be found at:

The only amateur radio activity from the Acteon Group took place more than 28 years ago by Robert Berry (F05BI/P). He operated in April 1990 from the Marutea Sud Atoll. This IOTA reference is currently ranked #6 on the Most Wanted IOTA Listing, needed by 98% of the IOTA members. Since at the time of this operation there will be 1126 IOTA references activated to date, compared to 340 current DXCC entities, the rarity of this IOTA group corresponds to #2 on the DXCC Listing. The Morane Atoll is the only counter of the New IOTA Group OC-297. It fits the "Remote Island Group" criterion (IOTA Programme Structure B.1.3). Both Atolls are uninhabited. The plan is to operate from each Atoll for 5 full days. Activity will be on CW, SSB and 40-10 meters concentrating on the bands that will exhibit the best propagation conditions within specific time windows for each region. They will maintain one station on 20 m as long as the propagation will permit in order to maximize the number of unique stations logged. This is a complex and extremely expensive project, and they need your support to defray some

of the considerable costs incurred! All donors will be timely acknowledged on their Web site at: <https://tx0a-tx0m.weebly.com> QSL via VE3LYC, direct, by the Bureau or ClubLog's OQRS.

PLEASE NOTE: Since the Webmasters of the new <www.iota-world.org> have decided NOT to post or dedicate a Web page to announce upcoming IOTA operations, PLEASE send your IOTA operations information to the OPDX, and we will post it here in an upcoming bulletin.....
